

ACT NOW

and see if you're getting the most from your asthma medicine

Take the Asthma Control Test™ (ACT™) to find out.

Please answer these questions as honestly as possible. Your answers will help you and your doctor figure out whether your asthma is as well controlled as it could be.

The Asthma Control Test™ (ACT™) is a five question health survey used to measure asthma control in individuals 12 years of age or older. The survey measures the elements of asthma control as defined by the National Heart, Lung, and Blood Institute (NHLBI). ACT™ is an efficient, reliable, and valid method of measuring asthma control with or without lung functioning measures such as spirometry.
